Summary

Final-year B.Tech Computer Science student with a solid background in software engineering, data-driven systems, and intelligent applications. Experienced in building scalable solutions for AI, backend systems, and full-stack development. Capable in problem solving, system design, and creating efficient, user-focused applications with modern tools and technology. Internships, projects, and open-source contributions have demonstrated the ability to work collaboratively while generating practical and significant solutions.

Education

B.Tech in Computer Science 8.16	2022 – 2026
Amity University	
Bharatiya Vidya Bhavan's Vidyashram 86.4%	2022
CBSE Board 12th	
Bharatiya Vidya Bhavan's Vidyashram 89%	2020
CBSE Board 10th	

Skills

- *Languages:* Python, Java, Kotlin, HTML, CSS
- *Tech Stacks/Frameworks:* Android, Pandas, NumPy, Matplotlib
- *Tools:* Git, MySQL, PowerPoint, Excel

Experience

Jabsz Gaming Studios	May - July 2025
Web Development Intern	
◦ Developed Dice Duel, a turn based probability-driven mobile game using React Native, Expo and Firebase Firestore, collaborating with others. Developed core game logic, betting mechanics, dice roll prediction, and calculations of rewards based on the multiplier system ($2\times/4\times$), plus real-time state management of local and AI multiplayer. Reliable session continuity with integrated Firebase Firestore for persistent data storage and backend synchronization. Duties included cross functional collaboration and delivering responsive UI, smooth gameplay, and scalable code architecture at Jabsz Gaming Studio LLP as a Backend Developer Intern.	

Projects

Context Aware Conversational AI For Customer Support	Dec – April 2026
◦ Developed a multi-turn, context-aware chatbot for customer service, implementing NLP capabilities like Intent Recognition, Entity Extraction, and Dialogue State Tracking to provide contextually relevant responses. Developed and fine-tuned Hugging Face transformer models on annotated data sets, and implemented a Flask/FastAPI backend and the Chainlit front-end for scalable, real-time conversational interactions.	
AI-Based Facial and Emotion Detection System	Dec – Jan 2025
◦ Implements an emotion recognition system using real-time face detection, pre-processing and classification with a CNN based deep learning model and OpenCV library. Optimized model inference and image processing pipelines for high prediction accuracy, low latency and seamless real time.	
Healthcare Management System	Sept – Oct 2024
◦ Built an efficient, scalable system with MySQL and Python to simplify patient registration, appointment scheduling, and doctor access. Delivered secure, intuitive interfaces and robust data validation, streamlining healthcare workflows for users while supporting future growth.	
Food Ordering App	June – Aug 2024
◦ Developed a user-friendly mobile app using Kotlin, XML, and SQL with features like user authentication, multi-order handling, and cash payments. Delivered a seamless, secure experience that enhances customer satisfaction, optimizes processing, and ensures data management throughout the application.	

Awards and Volunteering

Internship	Jan – Mar 2025
Kind Beings(NGO)	
Contributor	May 2024
Girl Script Summer Of Code(GSSoC)	
Python for Data Science	2023
IIT Madras - Ranked among the top 5% in the course.	

Certifications

Microsoft Azure AI Fundamentals (AI-900)	2025
Microsoft Azure Data Fundamentals (DP-900)	2025
TATA Forage: Data Visualization	2025
Oracle Cloud Infrastructure Generative AI Certified Professional	2024
Body Language: Key to professional success(IIT Roorkee)	2024
Python for Data Science(IIT Madras)	2023
